PROFESSIONAL SUMMARY

Backend Developer with experience building RESTful APIs, database-driven applications, and internal automation systems. Skilled in Java Spring Boot, Node.js Express, Laravel, PostgreSQL, MySQL, MongoDB, Git, JWT authentication, and API documentation. Experienced in backend service development, database design, and collaboration with frontend developers using Agile/Scrum methodology.

WORK EXPERIENCE

Backend Developer Intern - PT Digital Solusi Nusantara

Medan, Indonesia | January 2025 - June 2025

- Developed RESTful APIs using Java Spring Boot for employee management and attendance modules.
- Designed and optimized PostgreSQL database tables for users, roles, attendance records, and departments.
- Implemented JWT-based authentication and role-based access control for admin and employee users.
- Created API documentation using Swagger/OpenAPI to support frontend integration.
- Collaborated with frontend developers and QA team in a Scrum-based development process.
- Used Git and GitHub for version control, pull requests, and code review.

Junior Web Developer - Freelance Project

Remote | July 2024 - December 2024

- Built a Point of Sale backend system for a coffee shop using Express.js and MySQL.
- Created CRUD APIs for products, categories, transactions, customers, and store branches.
- Implemented sales report endpoints to support daily transaction summaries.
- Integrated file upload handling for product images.
- Deployed the application to a VPS using PM2 and Nginx.

PROJECTS

CV Screening Application

- Built a CV screening API using FastAPI and LangChain to compare candidate CVs with job requirements.
- Implemented PDF text extraction and structured JSON output for match score, skill match, missing skills, strengths, weaknesses, and recommendation.
- Used OpenRouter as the LLM provider and designed API endpoints for frontend integration.

Internal Document Automation System

- Created an automation tool using Google Apps Script to process form submissions into Google Sheets.
- Reduced manual document input by automatically formatting and storing submitted data.
- Added validation rules to reduce input errors.

TECHNICAL SKILLS

Programming Languages	Java, JavaScript, TypeScript, PHP, Python
Backend Frameworks	Spring Boot, Express.js, Laravel, FastAPI
Databases	PostgreSQL, MySQL, MongoDB
API Development	REST API, Swagger/OpenAPI, JWT Authentication
Tools	Git, GitHub, Postman, Docker basic, Nginx, PM2
Methodologies	Agile, Scrum

EDUCATION

Bachelor of Computer Science - Universitas Sumatera Utara

Medan, Indonesia | 2020 - 2024

CERTIFICATIONS

Backend Developer Bootcamp - Binar Academy

Learned JavaScript, PostgreSQL, REST API development, authentication, media handling, testing, deployment, Git collaboration, and Scrum methodology.
